FASCINATING FACTS: HUNTING DOGS

After watching Fascinating Facts: Hunting Dogs you learned many facts about these incredible hunting companions. First, follow the mazes for each type of hunting dog to find their targeted species. Afterwards, match answers A, B, C and D with the proper description of a type of hunting dog. After you're done, work on the reflection question and hand it in to you teacher.

- A. Blood Tracking Dog _____
- B. Sight Hunting Dog _____
- C. Treeing Dog _____
- D. Scent Hunting Dog _____

1. This dog has an incredible sense of smell and can follow a trail of scents left behind by animals. It's commonly used to track down lost animals or hunt animals like deer.
2. This dog uses its sharp eyes and quick reflexes to spot prey in the field. It's known for running fast and can see prey from a distance.
3. These dogs are excellent at tracking animals up trees, such as squirrels or raccoons. They bark loudly once they've found the prey high up in the tree.
4. These dogs are trained to follow the scent of blood, especially to find injured animals that have been shot. They are often used by hunters to track wounded game.

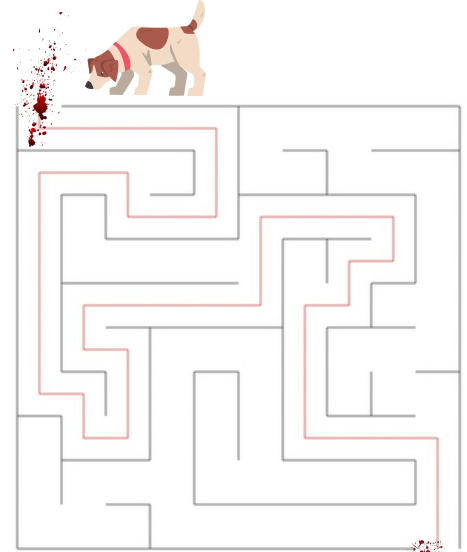

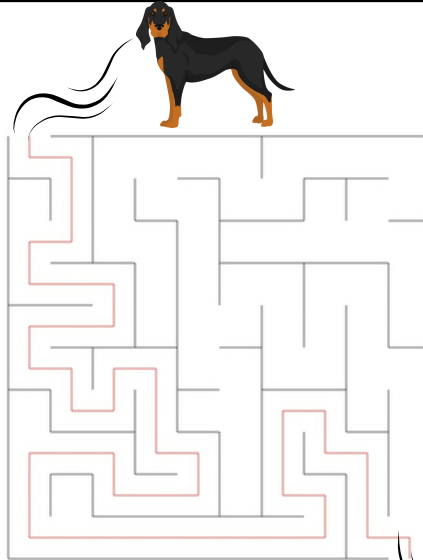

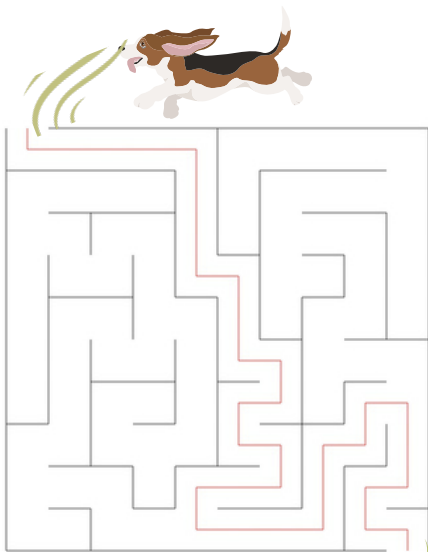

Imagine you are a hunter or animal tracker. You can choose only one type of dog for your mission. Based on what you've learned, which type of dog would you pick and why? Write a short paragraph explaining your choice.
